

Global Expert Scans (GES)

Finding, profiling, short listing and interviewing experts from around the world

Global Expert Scans (GES)

*Commissioned Global Expert Scans,
AUD10,000*

Global Expert Scans (GES) are an effective way to identify global thought leaders and deliver valuable insights for immediate application to your challenges.

Assess capabilities of more than 50 experts across consulting and industry from more than 10 peer markets.

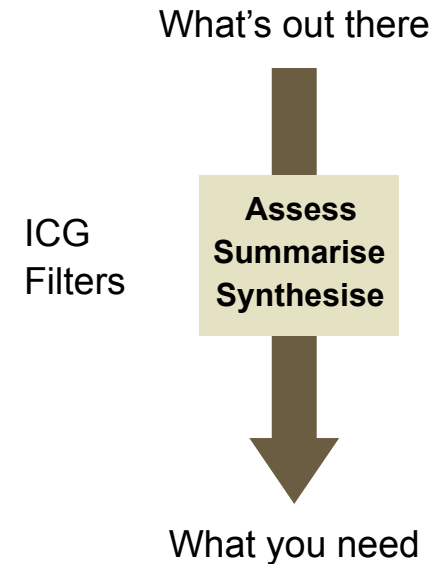

- A unique synthesis of the leading global thinkers on any topic
- Garnered from peer markets across consulting and advisory firms as well as industry
- Includes deep-drill subject matter expert interviews
- Enables consideration of best available resource to tackle challenges.

GESs are a companion resource to project kick-offs and are developed using ICG's unbundled consulting resources. GESs are also supported by the ICG Knowledge Area Review (KAR), a peerless synthesis of available information (public sources, applied science journals, research databases, public company records), which can be assembled on almost any topic, to your personal specifications.

The ICG Global Expert Scans (GES) identifies global thought leaders and delivers valuable insights for immediate application to your requirements

The GES approach

- Develop understanding of your core requirement
- Compile list of known experts
- Build list of subject focus and specific relevant expertise
- Interview select group for deep-drill insights
- Deliver structured and synthesised output suitable for your requirements.

ICG's unique position and capabilities provides true independence and global coverage
